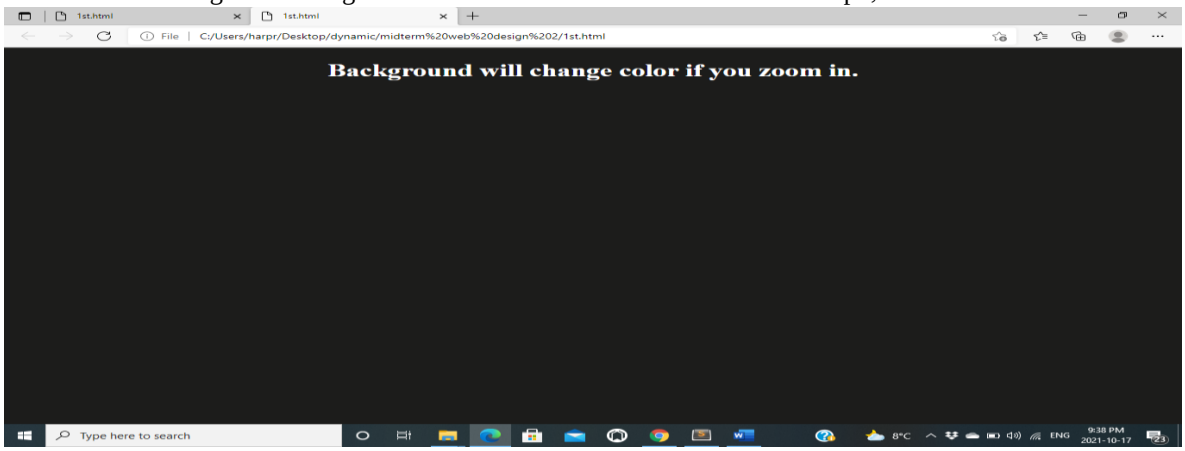
Web Design and Development - 2
Intra exam

Name : **Harpreet kaur sidhu** **Mark :**

Question 1

Create a HTML5 document associated with a CSS file. Using a media query, make it so the background changes color when the screen is narrower than 800px;



Question 2

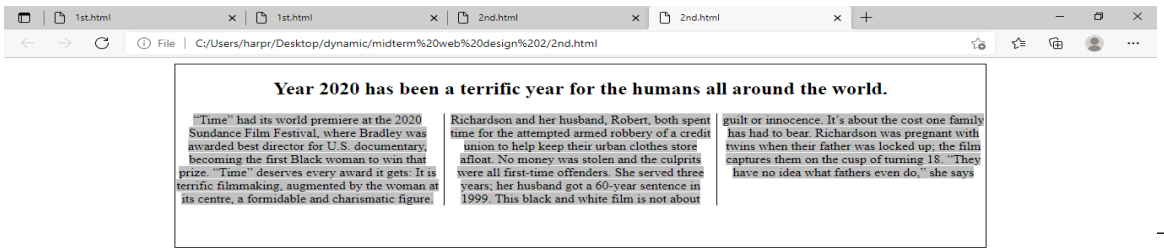
Create a container displaying text in columns :

1) The container 960px wide and 250px high centered horizontally with a 1px border.

2) Integrate a text using using a 3 columns layout with a 1 px rule (vertical separator).

3) Create a title (« Question 2 ») that spans over the three columns.

Example :



/40

/10

/5

Question 3

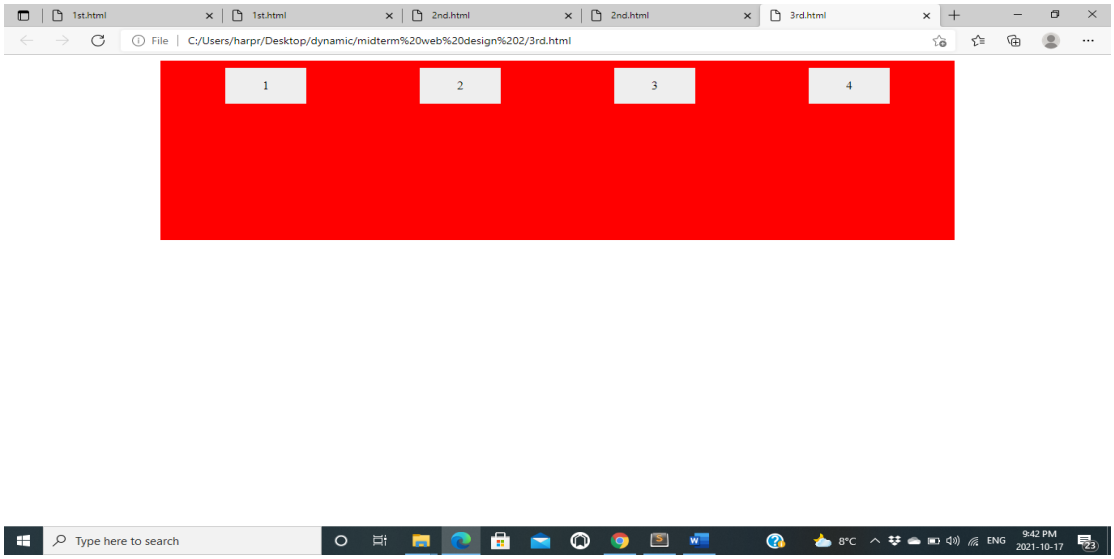
Create a flex container :

1) The container must be maximum 960px wide and of minimum 250px high

2) It must contain 3 equally wide items with a red background positioned on a row, displayed horizontally and aligned on top.

3) Using the wrap property, make it so when the browser's window gets narrow, the three items position themselves one over the other (they wrap).

/5



/10

Question 4

/10

Create a grid container :

1) The container must be 960px wide and 400px high centered horizontally

2) It must use a grid to display four items, each of them having a different background color.

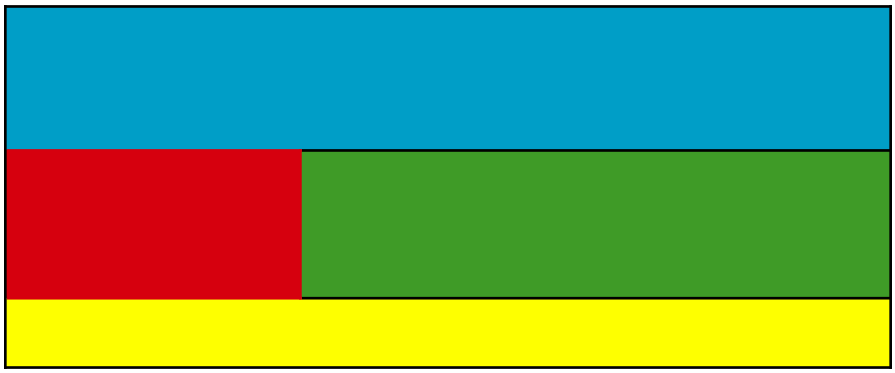
3) The first item should use the entire first row and one third of the container's height.

4) The second items should use one third of the second row.

5) The third item should use two thirds of the second row

6) The fourth item should use the entire third row and one sixth of the container's height.

Example :



Out put

4 out put in coding
